

### **Process Engineer**

Maintains, modifies, and changes injection machine molds, tooling, and injection mold machine programs with a limited amount of machine downtime. Monitor and control molding production to ensure quality, cycle time, and uptime and rejects/scrap targets are maintained at acceptable levels. Ensure that equipment and molds are operating in a safe and effective manner. Responsible for start-up, process verification, troubleshooting and root cause analysis of any issues related to Engel plastic injection molding machines. Gather information necessary to set up and run sample orders. Perform all necessary maintenance on the machines.

#### ***Position Requirements:***

- Five or more years processing experience in the injection molding industry
- Knowledge of SPC
- Basic PC skills
- Knowledge of basic math (decimals and fractions)
- Good mechanical skills
- Strong problem solving and analytical skills
- Training in Scientific Molding

We offer a competitive salary plus a full range of benefits including medical, dental, disability, life, flexible spending accounts, 401(k), educational reimbursement, and more. **ASYST** Technologies LLC is an Equal Opportunity Employer.
